INTERNSHIP REPORT

2024-25

A report submitted in partial fulfillment of the requirements for the Award of

Degree of

BACHELOR OF TECHNOLOGY

in

Computer Science Engineering

by

Mr. Aaditya Chouhan

2110DMTCSE10115

Under the Supervision of

Industry Mentor

Mr. Shakir Hussain

Associate Software Enginner

Unblock Amenities Pvt. Ltd.

Indore (M.P)

University Mentor

Dr. Abhishek Sharma

Associate Professor

Computer Science Engineering

SVIIT

(Duration: 20th January 2025 to 05th May 2025)

Department of Computer Science Engineering

Shri Vaishnav Institute of Information Technology

Indore - Ujjain Road, Indore (M.P) – India - 453111

**SHRI VAISHNAV VIDYAPEETH
VISHWAVIDYALAYA,
SHRI VAISHNAV INSTITUTE OF INFORMATION TECHNOLOGY**

2024-25

DECLARATION

I hereby declare that work, which is being presented in the Internship Report as the partial fulfillment for the award of degree of **Bachelor of Technology** in **Computer Science Engineering** in the **Department of Computer Science Engineering** at **Shri Vaishnav Institute of Information Technology** of Shri Vaishnav Vidyapeeth Vishwavidyalaya Indore, is an authentic record of my work carried out under the Mentorship of **Mr. Abhishek Sharma, Associate Professor Department of Computer Science Engineering**. The matter embodied in this internship report has not been submitted for the award of any other degree.

Ref. No-HR/67/2025

TO WHOMSOEVER IT MAY CONCERN

We are glad to inform you that Mr. Aaditya Chouhan from Shri Vaishnav Vidyapeeth Vishwavidyalaya has successfully completed his internship at Unblock Amenities PVT. LTD. under Inversion Consultant of Mr. Shakir Hussain. From 20th January 2025 to 20th April 2025.

During his internship, he was exposed to the various activities in the MERN stack domain, implementing Control Flow, Troubleshooting, and many more skills. He had a good code of conduct during both training and project, displaying dedication. Also, he was very much interested in getting into the depth of the concepts and technicalities involved to understand it better.

His association with us was fruitful and we wish him all the best in his future endeavors.

With Best Regards,

For: Unblock Amenities PVT.LTD

Acknowledgement

First, I would like to thank **Dr. Upinder Dhar**, Hon'ble Vice Chancellor of the University for giving me an opportunity to do the internship with the external organization.

Secondly, I would like to extend my sincere gratitude towards the Directors **Mr. Amit Chouhan** and **Miss. Nikita Bhagat** of **Unblock Amenities Pvt. Ltd.** for giving me an opportunity at their esteemed organization.

I also would like to thank all the people that worked along with me at **Unblock Amenities Pvt. Ltd.** With their patience and openness, they created an enjoyable working environment. It is indeed with a great sense of pleasure and immense sense of gratitude, that I acknowledge the help of these individuals.

I am highly indebted to Director **Dr. Anand Rajavat** and HoD **Dr. Jigysu Dubey**, for the facilities and continuous support provided by them to accomplish this internship. I would also like to thank my faculty mentors **Dr. Abhishek Sharma** and **Mr. Shakir Hussain** for their constructive criticism throughout my internship. I would like to thank them for their support and advice to complete internship in above said organization. I am extremely great full to my department's staff members and friends who helped me in successful completion of this internship.

Aaditya Chouhan

SHRI VAISHNAV INSTITUTE OF INFORMATION TECHNOLOGY**

Executive Summary

This report presents an overview of my internship experience at Unblock Amenities Pvt. Ltd., where I worked as a part of the web development team. During the internship, I gained hands-on experience in full-stack development using modern technologies, with a primary focus on the MERN stack (MongoDB, Express.js, React.js, Node.js). I contributed to designing and developing key features of web applications, participated in team discussions, and resolved real-world technical challenges under the guidance of my mentors.

Through this internship, I enhanced my technical skills, understood the workflow of software development in a professional setting, and learned the importance of collaboration, version control, and agile methodology. The project tasks provided practical exposure that bridged the gap between academic knowledge and industry practices.

In conclusion, this internship has been a valuable learning experience that has strengthened both my technical foundation and professional work ethic, preparing me for future roles in the software development industry.

CHAPTER 1

BRIEF INTRODUCTION OF ORGANISATION'S BUSINESS SECTOR

1.1 INTRODUCTION

The organization operates within the Information Technology (IT) sector, a key driver of innovation and economic growth in India. The IT sector encompasses software development, IT services, system integration, digital solutions, and emerging technologies like cloud computing, artificial intelligence, data analytics, and cyber security.

India's IT industry has established a strong global presence, offering cost-effective, high-quality services to clients worldwide. It contributes significantly to GDP and employment, and plays a vital role in supporting digital transformation across sectors such as finance, healthcare, education, and logistics.

With increasing internet penetration and government initiatives like Digital India, the sector continues to expand rapidly. Today, the Indian IT ecosystem is marked by a blend of global tech firms, agile startups, and innovation-focused service providers, positioning it as a global technology hub.

CHAPTER 2

OVERVIEW OF THE ORGANISATION

2.1 BRIEF HISTORY

Unblock Amenities Pvt. Ltd. was incorporated on **16th April 2019** in Indore, Madhya Pradesh. It was since its inception, the company has focused on delivering comprehensive IT solutions, including web and mobile application development, digital marketing, and IT consulting services. Over the years, Unblock Amenities has established itself as a reliable technology partner for businesses seeking customized and scalable digital solutions.

Figure 2.1: Unblock Amenities Pvt. Ltd. Logo

Unblock Amenities Pvt. Ltd. additionally, the company offers sales and marketing services, as well as IT services such as Web Design and Development, Mobile Application Development and many more. Located in Indore, Madhya Pradesh, Unblock Amenities Pvt. Ltd. has its registered office in this bustling city.

With a team of dedicated developers, the company is committed to delivering top-notch solutions to its clients.

2.2 BUSINESS SIZE

Unblock Amenities Private Limited is a Private incorporated on 16th April 2019. It is classified as Non-government company and is registered at Registrar of Companies, Indore. Its authorized share capital is Rs. 10,00,000 and its paid up capital is Rs. 10,00,000. It is involved in Maintenance and repair of office, accounting and computing machinery.

Directors of Unblock Amenities Private Limited are Mr. Amit Chouhan and Miss. Nikita Bhagat.

- Company Size: 50 - 70 Employees
- Associated Members: 20 - 25 Members
- Clients: 300+ Clients

2.3 PRODUCT LINE

Unblock Amenities Pvt. Ltd is the pioneer in web Development, Ecommerce Development, Custom Software Development, ERP, CRM, Website Design and Development, Graphics Designing, Digital Marketing Services (SEO, SMM, SEM) across the world. Their web application and versatile application advancement administrations offer a wide scope of IT answers for various endeavors. Traversing from a venture, retail to customer confronting applications, we have constructed dependable answers for all longings and each area.

Services:

- Web Designing
- Graphic Designing
- Software Development
- Digital Marketing
- Web Development
- Mobile Application Development

2.4 COMPETITORS

Some of the major competitors of the company in the market are:

- Unicorpse Technologies Pvt. Ltd.
- P&P Infotech Applying Solutions

2.5 BRIEF SUMMARY OF ALL THE DEPARTMENT

Unblock Amenities offers a diverse range of IT services tailored to meet various business needs:

- **Web Design and Development:**

The company specializes in building responsive, visually appealing, and SEO-optimized websites that deliver a seamless user experience. Their services include UI/UX design, custom web development, CMS integration, and e-commerce solutions.

- **Mobile Application Development:**

Unblock Amenities develops robust and scalable mobile applications for both Android and iOS platforms. Their mobile solutions are designed to enhance user engagement and support a variety of functionalities including location services, push notifications, and in-app purchases.

- **Digital Marketing:**

The company provides comprehensive digital marketing services, including Search Engine Optimization (SEO), social media management, content marketing, pay-per-click (PPC) advertising, and email campaigns. These services aim to boost brand visibility, drive targeted traffic, and improve ROI for clients.

CHAPTER 3

PLAN OF INTERNSHIP PROGRAM

3.1 INTERNSHIP PLAN AND GUIDELINES

Main purpose of an internship is to provide real-world experience that enables a student to put everything they've learned into action. It can help students to gain skills that can be applied to future jobs and allows them to take time to understand industry culture and work ethics. It gives them the opportunity to understand each task assigned and every new tool and technology used.

Main guideline for internship program as per university course norms was that internship should be of 14 weeks duration and conducted in industry related to the student's respective branch of study. Coordination for the internship was done by external mentor (from industry), internal mentor (college guide) and student. I was asked to submit fortnight reports every 15 days which informed internal mentor about all tasks performed in that period. And every month an evaluation report was submitted from an industry mentor, which gave an executive summary of how student performed the task assigned to them.

3.2 STARTING AND ENDING DATE OF THE INTERNSHIP

The internship started at 20th January 2025 to 05th May 2025 letting me complete 14 weeks in the firm.

3.3 INTERNSHIP DEPARTMENT

Roles and responsibilities provided in the complete internship were specific to the development and designing department. Task includes designing web pages and developing its modules with technology and tools provided. These tasks were performed under supervision of technical mentors in the company.

CHAPTER 4

TRAINING PROGRAM

4.1 ROLES AND RESPONSIBILITIES

The internship program, program started on January 20th 2025. The internship was for 14 weeks and ended on May 05th 2025. During the internship, various tasks and responsibilities were assigned to me.

Following are roles and responsibilities provided:

- My initial task was to gather the requirements of the website and create a project plan that outlines the website's structure, design, and features.
- Design website layout using HTML and CSS
- Developed Components in React.js to link Frontend with the Node Backend.
- Used JavaScript to add dynamic content to the website, such as user authentication, and dynamic page rendering.
- Test and debug: Test the website on different devices and browsers to ensure that it is working correctly. Debug any issues that arise during testing.

By following these steps, you can develop a functional and visually appealing website front-end using HTML, CSS, Bootstrap, React.js, and Node.js.

4.2 PROJECT DESCRIPTION

So, to develop the Website, we basically followed Designing page and collaborating to each other for access. At first after getting the requirement of clients we plan how we are going to develop the application step by step. Then we went for requirement analysis what are the things we are going to require to develop the Website i.e., developing tool database (MongoDB), front-end (HTML, CSS, Bootstrap and React), coding we are going to do in JavaScript.

After front-end was designed it is very essential to define the variable names, which makes coding efficient. Now to approach towards web application in an effective way

we need to create different packages DAO and model so it makes easy to connect the coding part and perform changes whenever required. So now comes the time where main programming or coding part started. We need to learn about some new libraries in JavaScript to deal with the application.

After front-end was designed it is very essential to define the variable names, which makes coding efficient. Now to approach towards web application in an effective way we need to create different packages DAO and model so it makes easy to connect the coding part and perform changes whenever required. So now comes the time where main programming or coding part started. We need to learn about some new libraries in JavaScript to deal with the application.

The initial task assigned to all interns was research work. I conducted in-depth research on the **MERN stack** (MongoDB, Express.js, React.js, and Node.js), focusing on its architecture and core components. I explored the **MVC (Model-View-Controller)** design pattern and studied essential files such as server.js, route handlers, controller files, and database models defined using Mongoose. This helped me build a solid understanding of how each layer interacts in a full-stack JavaScript environment.

Once the research was complete, our mentor assigned us the task of designing the layout and structure for our individual sub-modules. Layout, in this context, refers to the systematic arrangement of UI components and elements on the page using React, ensuring usability and responsiveness. This step marked the transition from planning to actual implementation, setting the foundation for module development.

After the bugs and errors were found out we discussed the errors and bugs with our team and try to resolve them and again test that module, after this step is applied on all module is done, again the testing of whole software is done to assure the quality of product.

While making the web application several times we came across difficulties which we are not able to resolve, so we took the help of our mentor and senior employees of the company.

CHAPTER 5

LEARNING EXPERIENCE

5.1 KNOWLEDGE ACQUIRED

My internship was concerned with website development and specifically I worked on a front-end part of the website project during this period I gained knowledge about real world development of website.

Learned about how projects go through various phases of the development cycle. It starts with requirement analysis followed by designing and development, then in testing phase and at last deployment. Apart from this basic cycle, how projects get managed according to the timeline provided and after considering all those parameters, a software development model is selected and followed.

Also, various subjects, concepts and theory which were part of my course curriculum in university helped me to learn and understand the training knowledge in a better way and also to apply various concepts in various solutions for my tasks. With my basic knowledge for software development, database, programming skills which were learned in the institute helped me in completing my task effectively. Due to this prior knowledge, it was easy to learn in depth concepts and new approaches for various skills which are used in real world problem solving. Internships provide opportunities to get acquainted with the working culture of industry and explain how things are managed while developing products for clients and satisfy business needs and requirements.

It also helped me in acquiring knowledge on various new technologies like MERN Full Stack Development.

5.2 SKILLS LEARNED

Internship helped me to gain various new skills including both technical as well as soft skills which are important in professional working culture and industry. Technical skills related to development of application and how various problems are solved to achieve.

Apart from these, the main skill learned was how to apply the reusability concept in real world application and create modules which are generic and reusable which increase the development rate. Learn various approaches and methods to create generic modules.

Other than technical skills there are various soft skills which I came across and get to learn about them as well as apply it. It includes communication skills, adaptability in the working environment, responsibility for work, time management etc. These soft skills will help me in my future professional journey. And these work ethics are also important from an industry culture perspective where an individual interacts with many other professionals hence these ethics help to maintain business integrity.

5.3 OBSERVED ATTITUDE AND VALUE GAINED

An internship is an opportunity to test drives a career. It provides student with experiences, lessons, and the tools needed to get a full-time professional in the future. It gives them a feel for work without being thrown into the deep end straight away. Hence, it provides the opportunity to grow and learn before fully entering the working professional world. One of the most important things gained from this internship is newfound knowledge.

This can include knowing how to fulfill tasks that are relevant to desired career path and sharpening the skills that are already possessed. There are various values, ethics and attitudes which I get to know about during my internship program. Some of main values and attitudes are as follow:

- **Professional Communication:** Communication is one of the most important values in any industry or field. It gives us the ability to express our thoughts, ideas, perspective, suggestions etc. effectively in group or to our superior.
- **Hard Working:** Working hard to complete any task whether it is small or big is an important value in industry as it helps student to build a good work ethic, and people will notice the efforts put in.
- **Solution Oriented and Innovative:** In internship period one needs to be solution oriented and is able to find optimal solutions for any problem and it also increases once innovative thinking and capabilities.
- **Learning:** Main objective of the internship is to gain knowledge of the field and the subject of the training program for these learning attitudes is one of the most important aspects for interns to have.
- **Analytical Thinking:** Analytical perspective adds a logical way to find a solution for any problem. Research and analysis help to find optimal solutions for any task.

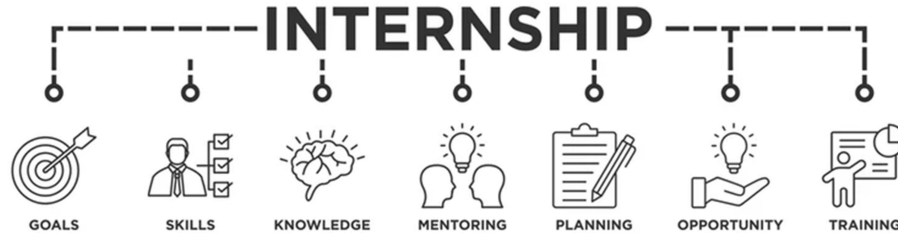

Fig: 5.3 Values Gain

5.4 MOST CHALLENGING TASK PERFORMED

During the internship period, various tasks were performed such as designing pages, creating workflows, sending and receiving data between pages, and more. Among all the tasks, the most challenging was changing the fields of registered models, as once registered they reflect on the website. After changes, everything had to be migrated again, which was difficult. The testing phase was even more challenging as every single module was checked.

5.5 DETAILED DESCRIPTION OF THE TASK

The project was to design and develop an efficient web-based **To-Do application** using the MERN Full Stack. The goal of the app is to allow users to manage their daily tasks efficiently by enabling login, registration, task creation, and task tracking.

It also allows the admin to monitor user activity and provide necessary assistance. To accomplish this task, I followed a development process that included planning, designing, coding, and testing the application. I used **HTML** to create the structure of each page and **CSS** to ensure a clean and responsive design.

The app includes features such as **user authentication, task creation, task updates, and a personalized dashboard for users to manage their activities**. Once logged in, users can view, add, update, and delete tasks based on their requirements.

In addition to building the To-Do app, I was also assigned tasks in a live project, where I worked on debugging frontend issues and designing reusable components to enhance the user experience.

Overall, my task was to build a functional and user-friendly To-Do application that helps users stay organized and improves their productivity through an intuitive web interface, while contributing actively to real-time project development and problem-solving.

CHAPTER 6

STRENGTH, WEAKNESS, OPPORTUNITIES, THREAT ANALYSIS

6.1 What is SWOT Analysis?

SWOT (strengths, weaknesses, opportunities, and threats) analysis is a framework used to evaluate a company's competitive position and to develop strategic planning. SWOT analysis assesses internal and external factors, as well as current and future potential. A SWOT analysis is designed to facilitate a realistic, fact-based, data-driven look at the strengths and weaknesses of an organization, initiatives, or within its industry. The organization needs to keep the analysis accurate by avoiding pre-conceived beliefs or gray areas and instead focusing on real-life contexts. Companies should use it as a guide and not necessarily as a prescription. SWOT analysis aims to identify the key internal and external factors seen as important to achieving an objective. SWOT analysis groups key pieces of information into two main categories:

Internal Factors: the strengths and weaknesses internal to the organization.

External Factors: the opportunities and threats presented by the environment external to the organizations.

Fig: 6.1 SWOT Analysis

6.2 SWOT ANALYSIS FOR ORGANISATION

SWOT analysis helps companies to get a clear understanding of their business and can evaluate their performance and help them to build future plans for the company on the basis of SWOT analysis. SWOT analysis for the organization is as follow:

- **Strength:** Company strength includes its customer support presently there are 100+ active clients which create a good customer base to work with. These expanded customer support also give rise to the financial strength of the company.
- **Weakness:** Presently most of the services are running very well but with the growing technology world and new business demand there should be services provided using new technology and domain.
- **Opportunities:** Future technologies such as AI, ML, IoT, Blockchain, Quantum Computing, and Biometric technologies are expected to enhance the effectiveness of security systems by improving threat detection, automating security processes, enhancing cyber security, improving encryption and cryptography, and facilitating the use of biometric authentication.
- **Threats:** Some of main threats for the company can that as for now there are many major competitors for the company providing same services may affect the organization business. And the area where it has competitors, the other industries may use newer technologies to provide solutions to customer.

Strength	Weakness	Opportunities	Threats
Customer Support Company Services	Adaptive new Technology	Huge Customer Base Cutting-edge technologies can be used in the business	Government Policies New business establishment

Table 6.1 SWOT Analysis Summary

CHAPTER 7

PROBLEM IDENTIFICATION AND SOLUTION

7.1 PROBLEM IDENTIFICATION

Problems are at the center of what many people do at work every day. Whether you are solving a problem for a client (internal or external). Supporting those who are solving problems, or discovering new problems to solve, the problems you face can be large or small, simple or complex, and easy or difficult. A fundamental part of every manager's role is finding ways to solve success. Every organization has more or less some problems in their working environment. The key importance should be given to solve the problems.

Rapid change in technology – As we all know in the world of science there is every second new innovations across the world. Now being a small firm, it has a problem in adapting with new coming technology which the customer demands. Lack of new technology staff hinders the company's growth somehow.

Lack of new resources – As discussed earlier, rapid change means rapid advancement in resources. Due to lack of newer resources which are pre- requisite for new development push the company growth in backward direction.

7.2 CONSEQUENCES OF THE CUREENT PROBLEM

The various consequences for the above listed problems are as follows –

- Due to this major problem of this company, the company's reputation among the customers to deal with new technological advancements is hindering.
- Directly affects the co-operation and co-ordination of the clients and employees.

7.3 SOLUTIONS

- Company should train their employees at their cost. So that company growth must be kept first.
- Communicate the needs and expectations of the client within the organization as well.
- Create a prototype to confirm and/or refine final agreed-upon requirements.
- Following a formal quality assurance process is imperative for a successful launch.
- There must be proper management of security equipment with adequate licenses.

CHAPTER 8

CONCLUSION

8.1 CONCLUSION

In the internship at Unblock Amenities Pvt. Ltd. has been an excellent and rewarding experience as it has helped me to enhance my skills, abilities and knowledge. Not only did I gain practical and technical skills but I also had the opportunity to meet many new people with excellent industry experience who helped me in all possible ways. Main objective of the internship was to get real world software industry knowledge which was fulfilled at all possible levels. Throughout my internship, I could understand more about IT professionals and its working culture which will help to prepare myself to become a responsible and innovative technical professional in future.

There are also other skills which I got to know, apply and practice like time management, professional communication, completing tasks in a given timeline, learning and analytical skills etc. Other than soft skills it enhances various technical skills related to web application designing and development, project management, software development cycle, database and other tools. As with no prior experience with MERN Stack, whatsoever I believe my time spent in research and discovering it was well worth it and contributed to finding an acceptable solution to build various software modules. Main task assigned in my internship duration was related to research and finding a solution to create modules which can be reused in various different applications. Detailed solutions for such tasks are elaborated in different chapters of these reports. Project was created using MERN Stack technology.

Hence the overall internship program helped me to learn and sharpen up my knowledge in the technical part. Main points of tasks performed in internship includes creating modules and workflows in MERN, creating and deploying web pages, making common modules generic and reusable and integrating various third-party library.

Problem solving needs critical thinking and it needs experience and practice. To organize our tasks, we need to think about the problem first, all aspects require different solutions. As an intern I got familiar with live running websites and application, different problems faced in it and solutions which are used to solve them. There is a need of contagious plan for any application. We prepare ourselves for all the situation which can arise in the production and it's here critical thinking plays its role.

Overall experience of the industry abled me for handling pressure. Pressure handling in case of lack of time, and resources. Being able to solve client problem as quickly as possible. I came to know about handling the pressure from the seniors on the time when applications go live. Client interaction was also the important aspect, in fact one of the most important factors. To be able to deliver the product with the client satisfaction involves regular interactions.

Hence the overall experience of my internship was great and I got an opportunity to get exposed to industry culture and its working environment. And I also acknowledge efforts by colleagues, mentors and professionals who helped me throughout my internship.

15th January 2025

Subject: Internship Offer Letter

Dear Aaditya Chouhan,

With reference to your application, we are pleased to shortlist you for the “Software Developer Intern” position with **Unblock Amenities PVT.LTD.**

The total duration of the internship would be 3 months and a certificate will be provided after successfully completion of internship.

Your date of joining would be **January 20th, 2025.**

With best wishes and looking forward to a mutually fruitful association.

Welcome to the Unblock Family.

FORTNIGHTLY REPORT - I

Notification: SVVV/N-083/2019 Date: 03 / 02 / 2025

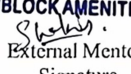

Fortnightly Report of the Student/Intern

Student Name: Aaditya Chouhan	Enrollment No.: 2110DMTCSE10115		
Name of the Industry: Unblock Amenities Pvt. Ltd. Mentor Name: Mr. Shakir Husain Mentor Email Id: ubapl2019@gmail.com	Period	Date From	Date To
	15 Days	20 / 01 / 2025	03 / 02 / 2025
Main points of the fortnight	1. Introduction to React.js : Understood React.js fundamentals Including the component based architecture, JSX and functional components.		
	2. Props, States & Hooks: Passing data between different components using props, and managing states using hooks like 'useState' and 'useEffect'.		
	3. Event Handling & Conditional Rendering: Handling button click, form submissions and user inputs. Worked with controlled components and conditional rendering using ternary and logical operators.		
	4. React Router (Basic Navigation): Set up 'react-router-dom' for navigation. Implemented basic routing with '<Route>' and '<Link>'.		
	5. Hand-On Practice: Built a simple authentication system using local storage as database and created a small react-based dashboard with dynamic routing.

FORTNIGHTLY REPORT - II

Notification: SVVV/N-083/2019 Date: 18 /02 / 2025

Fortnightly Report of the Student/Intern

Student Name: Aaditya Chouhan	Enrollment No.: 2110DMTCSE10115		
Name of the Industry: Unblock Amenities Pvt. Ltd. Mentor Name: Mr. Shakir Husain Mentor Email Id: ubapl2019@gmail.com	Period	Date From	Date To
	15 Days	04 / 02 / 2025	18 / 02 / 2025
Main points of the fortnight	1. Advanced Hooks Implementation:		
	• <code>useEffect()</code> – Fetching data on component mount and handling side effects.		
	• <code>useNavigate()</code>, <code>useRef()</code>, <code>useParams()</code> – Handling Navigation, referencing DOM elements, and Extracting URL parameters.		
	2. API calls using 'Axios': Performed HTTP requests,		
	Handling errors using 'try-catch'		
	blocks.		
	Implemented loading states while fetching data and applied 'async-await' for asynchronous data fetching and rendering.		
	3. Pagination and Filtering: Implemented client-side pagination with 'react-		
paginate' package. Added filtering and searching functions with mapping lists.			
4. Hands-On Practice: fetched data of user list from an API			
given by the mentor product catalogue			
with search and filtering functionalities.

FORTNIGHTLY REPORT - III			
Notification: SVVV/N-083/2019		Date: 05 / 03 / 2025	
Fortnightly Report of the Student/Intern			
Student Name: Aaditya Chouhan		Enrollment No.: 2110DMTCSE10115	
Name of the Industry: Unblock Amenities Pvt. Ltd.		Period	Date From
Mentor Name: Mr. Shakir Husain		15 Days	19 / 02 / 2025
Mentor Email Id: ubapl2019@gmail.com			05 / 03 / 2025
Main points of the fortnight		1. Setting Up Express.js: Initialized a Node.js project with express.js, created server handling different HTTP methods.	
		Implemented middleware such as 'express.json', 'CORS', learned about request-response lifecycle in express.js and how middlewares works.	
		2. MongoDB and Mongoose Integration: Connected MongoDB With backend using 'mongoose' package. Designed schemas and defined mongoose fields and models.	
		Implemented basic CRUD Operations on the database.	
		3. Build RESTful APIs: Structured a RESTful API with proper request handling. Implemented error Handling with appropriate HTTP status code.	
		4. Hands-On Practice: Built a basic authentication system using MongoDB database to store user information and validation with using API.

10.9 INDUSTRY MENTOR EVALUATION OF INTERN

Unblock Amenities Private Limited
137, Third Floor Ahilya Nagar Extension, Near Gopur Square,
Indore: 452009, Madhya Pradesh, India
Email: ubap12019@gmail.com
CIN: U72900MP2019PTC048370

INDUSTRY MENTOR EVALUATION OF INTERN

Date: 20th April 2025

Student Name: Aaditya Chauhan

Student Enrollment No.: 2110DMTCSE10115

Internship Address: 137, Ahilya Nagar Ext. Gopur Square Indore, M.P.

Dates of Internship: From 20th January 2025 to 20th April 2025

Evaluation of intern –

S. No.	Parameters of Evaluation	
1	Punctuality	10
2	Behavior	10
3	Shows interest in work	9
4	Learns quickly	8
5	Shows initiatives	9
6	Accepts responsibility	8
7	Organizational skills	9
8	Creativity/Originality	8
9	Problem Analysis, Design, Solution	9
10	Communication Skills	10
	Overall Performance of intern Total out of 100	90

Additional Remarks, if any:

He is very hardworking and dependable employee. We appreciate his contributions to the organization and wish him all the very best in his future endeavors.

10.10 FEEDBACK OF STUDENT ON INTERNSHIP

Notification: SVVV/N-083/2019

Date: 05/05/2025

Feedback of Student on Internship

Student Name: **Aaditya Chouhan**

Enrollment No.: **2110DMTCSE10115**

Internship is: ☐ with Stipend / ☒ without Stipend

Company / Organization Name: **UNBLOCK AMENITIES PRIVATE LIMITED**

Internship Address: **137, Gopur Square, Ahilya Nagar, Indore, Madhya Pradesh
452009**

Faculty Coordinator: **Dr. Abhishek Sharma**

Institute: **SHRI VAISHNAV INSTITUTE OF INFORMATION TECHNOLOGY**

Department: **Department of Computer Science and Engineering**

Dates of Internship: **From 20 / 01 / 2025 to 05 / 05 / 2025**

Give a brief description of your internship work (title and tasks for which you were responsible):

- **Title:** MERN Full-Stack Developer Intern
- **Tasks:** Developed frontend with React, built REST APIs using Node.js and Express, handled MongoDB operations, implemented authentication with JWT and email OTP, and worked on role-based access control.

Was your internship experience related to your major area of study?

At *Unblock Amenities Pvt. Ltd.*, I learnt about different concept of Frontend and Backend and to have adequate knowledge of technical things that are required in the field of development of the website through work and experience. I attained team work, leadership skills. inter personal and research skills. Yes, to a slight degree I agree that my Internship.

Yes, to a large degree

✓ Yes, to a slight degree

No, not related at all

This experience has:	Strongly Agree	Agree	No Opinion	Disagree	Strongly Disagree
Given me the opportunity to explore a career field	✓				
Allowed me to apply classroom theory to practice		✓			
Helped me develop my decision-making and problem-solving skills	✓				
Expanded my knowledge about the work world prior to permanent employment	✓				
Helped me develop my written and oral communication skills	✓				
Provided a chance to use leadership skills (influence others, develop ideas with others, stimulate decision-making and action)	✓				
Expanded my sensitivity to the ethical implications of the work involved		✓			
Made it possible for me to be more confident in new situations	✓				
Given me a chance to improve my interpersonal skills	✓				
Helped me learn to handle responsibility and use my time wisely	✓				
Helped me discover new aspects of myself that I didn't know existed before	✓				
Helped me develop new interests and abilities	✓				
Helped me clarify my career goals		✓			
Provided me with contacts which may lead to future employment		✓			
Allowed me to acquire information and/or use equipment not available at my Institute	✓				

Answer the following Question

Q.1. In the institute internship program, faculty members are expressed to be mentors for students. Do you feel that your faculty coordinator served such a function? Why or Why not?

Ans. Yes, my mentor served the mentioned function and was helpful throughout the whole period of the internship. He managed to the submissions on time without any pressure or delay both.

Q.2 How well were you able to accomplish the initial goals, tasks and new skills that were set down in your learning contract?

Ans. I learnt a lot of new ways and skills which I had planned to learn initially. It was a check on all the things I could learn from the organization.

Q.3 In what ways were you able to take a new direction or expand beyond your contract?

Ans. I learned interpersonal communication skills, discipline needed in work environment, team work and a lot of new languages that I did not knew before. I have a good hand on coding after the internship has ended and feel more confident now.

Q.4 Why were some goals not accomplished adequately?

Ans. Every goal that I had planned on to were completed adequately and it is fair to say that I accomplished more than I had planned to.

Q.5 In what area did you most develop and improve?

Ans. I develop and improved in the ability to code rigorously and solve errors.

Q.6. What has been the most significant accomplishment or satisfying moment of your internship?

Ans. The most satisfying moment of internship was that I got an opportunity to learn about web development and working on a Dummy project.

Q.7. What did you dislike about the internship? Considering your overall experience, how would you rate this internship? Give suggestions as to how your internship experience could have been improved?

Ans. The working hours should be part time or flexible enough to enhance the performance of an intern.

Q.8. Could you have handled added responsibility?

Ans. No as it was a new experience, I was unable to manage my time well.

Q.9. Would you have liked more discussions with your professor concerning your internship? Was closer supervision needed?

Ans. I got a proper guidance from my professor regarding internship also he helped me when needed.

Q.10. Was more of an orientation required?

Ans. Sometimes a bit more orientation was required.
